HIV and Hepatitis C Testing

This course aims to develop in-depth knowledge of testing technologies, approaches to testing, and how all service providers play an important role in reaching people with HIV and hepatitis C.

Topics covered:

- The importance of HIV and hepatitis C testing
- Approaches to reach people with undiagnosed HIV and/or hepatitis C
- Testing technologies available in Canada
- Testing as an entry point for linkage to prevention, treatment, care, and support services

To find out how your organization can participate, contact a Health Education Coordinator at CATIE:
